

WATERLICHT

WATERLICHT by Studio Roosegaarde is the dream landscape about the power and poetry of water. As a virtual flood, it shows how high the water could reach and raises awareness about rising water levels.

WATERLICHT is a combination of LEDs and lenses which create an ever changing layer of light, influenced by wind and rain. The WATERLICHT podcast broadcasts stories about the impact and potential of water. WATERLICHT has been exhibited around the world including Museumplein Amsterdam and United Nations in New York.
